PROJECTS

karma Realty

Real estate website

10/2022 - 01/2023

This website is created to show properties listed for sell in North Carolina, The challenge was to get new properties listed on their Api which is (1 lakh and above) and to store in our Database periodically. Creating UI and filtering all those properties.

Ventois

This website is made for an IT solution company known as Ventois where our challenge was mainly focus on how to increase SEO. Using blogs, page and their job opportunities, We used an minimal storage to store their blogs and jobs to boost website speed.

Cloud Bravura

This company provides cloud services they want a website which has blogs and jobs portal where user can apply for any open position they offer. They want a website which has low maintenance and low cost so we used Hygraph cms to store their blogs and jobs. Which also increase their speed and seo.

Star Group

Star group offers hospitality, IT staffing, cosmetology, and many more they have their own ventures where they rent rooms and all.

•

And many more.....

These projects help me to improve my logical skills, learn how to solve Realtime problems, And always inspire me to learn more.
